that can whiten and
brighten your smile
TODAY.

THE HASSLE-FREE COMPLETE WHITENING SYSTEM

The Smile Perfected™ whitening system will help you achieve a noticeably whiter, brighter smile in just 20 minutes with no sensitivity. The Prophy Plus™ whitening system can be completed hassle free, in just 20 minutes. Patients can achieve a professional whitening with no sensitivity and in less time than traditional, ineffectual, often painful methods of the past.

Learn more about how Smile Perfected™ is helping people across the country, in just 20 minutes, achieve:

- A Beautiful, Enhanced, Noticeably Whiter Smile
- A More Confident, Youthful Appearance
- Sensitivity Free Results In Less Time

HOW THE SIMPLE SYSTEM WORKS

The Prophy Plus whitening system begins with a professional cleaning by your favorite dentist. The complete cleaning provides the best possible conditions for the whitening process to be at its most effective to remove stains and whiten powerfully without sensitivity.

Smile Perfected™ is a simple to use, effective technology, including a patented pre-filled whitening tray that fits comfortably and allows the person to comfortably relax the jaw while their teeth whiten comfortably.

The tray applies a gentle layer of soft, pleasant tasting gel, specially formulated for maximum results without the sensitivity. The special formula includes an active ingredient that is activated using the Smile Perfected™ LED light to make 20 minutes all that is needed to achieve professional whitening results.

After 20 minutes you will achieve a noticeably whiter, more beautiful smile, but the Smile Perfected™ complete system also provides a take-home maintenance whitening pen, to help rejuvenate your youthful, beautiful smile and extend your results until your next visit..
